METAL QUOTE CHECK

ILLUSTRATIVE SAMPLE - COPPER / KG

Generated: 2026-10-03 02:00:00 UTC

Reference: SAMPLE-ONLY

Product/grade: Illustrative copper product - not a market quote

Quantity: 100 kg | Entered tax: 0%

YOUR COMPARISON

Offer A

Quoted unit price: INR 500.00 / kg

Goods: INR 50,000.00 | Freight: INR 2,000.00

Other charges: INR 0.00 | Modelled tax: INR 0.00

Total: INR 52,000.00 | Effective unit cost: INR 520.00

Offer B

Quoted unit price: INR 490.00 / kg

Goods: INR 49,000.00 | Freight: INR 5,000.00

Other charges: INR 0.00 | Modelled tax: INR 0.00

Total: INR 54,000.00 | Effective unit cost: INR 540.00

Lower modelled total: Offer A

Difference between offers: INR 2,000.00

PRICE SENSITIVITY

Only the goods price changes; quantity, tax and other charges stay fixed.

Offer A | -10%: INR 47,000.00 | Base: INR 52,000.00

+10%: INR 57,000.00

Offer B | -10%: INR 49,100.00 | Base: INR 54,000.00

+10%: INR 58,900.00

WHAT TO VERIFY BEFORE YOU ACCEPT

- Product form, copper content, impurity limits and assay basis.
- Delivery point, quality acceptance and any treatment or penalty terms.
- Match quantity, grade, delivery terms and tax treatment across both offers. A lower calculated cost does not establish supplier quality.

METHOD AND LIMITS

Total = (quantity x quoted unit price + freight + other charges) x (1 + entered tax / 100). The same entered tax is applied to all included charges. Real invoices may use different tax bases; this model does not validate them.

All prices are your inputs, in INR. This report does not use or certify live market prices, metal quality or seller reliability. Include all applicable charges yourself. This is a cost comparison, not investment, tax or purchasing advice.

Generated automatically with deterministic calculations. No analyst has reviewed the inputs. Changes in unit, purity, grade or delivery terms can invalidate the comparison.
